

## ACCOUNTABILITY REPORT

### Introduction

The run for water campaign drive is to help raise money to build 18 boreholes in Nakapiripirit district. People were getting sick due to water-borne diseases like typhoid and cholera. The issue had a very negative impact on the community.

Hydrogeologist consultancy fee	1,600,000
Treatment for water borne diseases	600,000
<b>TOTAL COST</b>	<b>5,520,000</b>

## **THANK YOU TO FUNDERS**

I would like to use this chance to give a special thank you to the donors for making this possible. So many lives have been saved and the community of Nakapiripirit owes you a big favor.

## **CONCLUSION**

The project raised more money than expected and we ended up having a balance. The project targets and milestones were exceeded. The money will be used to put up a few more bore holes, purchase a stock of medicine for water-borne illnesses and half of the Balance will be kept as an emergency fund bank for the region overseen by community elders who have the people's best interests at heart.
